U.S. Patent and Trademark Office PTOL=303 (Rev. 11-03) Continuation of 2. NOTE: The amendment improperly amends claims 1 and 14 by not properly braketing/striking through that which is to be deleted and thus raises new issues under 35 USC 112, second paragraph.

Continuation of 5. does NOT place the application in condition for allowance because: the Applicant argues that Nakamoto (US Patent 6,097,138) fails to teach the conductive projections and nanotubes being of the same material (page 8, lines 1-3). However, it is noted that claim 1 does not require that both the nanotubes and the conductive portions be of a homogeneous material. Rather the instant claims only require the micro-tip/conductive projections be of a homogeneous material. Nakamoto does teach only the conductive projections being of a homogeneous material (column 13, lines 35-38). Applicant's arguments are drawn to limitations not found in the claims and accordingly are not found to be persuasive.
